

# Why Go Under the Knife When You Don't Have To?

No need to suffer through invasive surgery or needles! Nature's FaceLift™ is formulated with a **barbadensis aloe vera gel base**, which fortifies and hydrates the skin. Our unique formula also includes **silk amino acids**, to provide your skin with a natural protective element which also leaves a smooth, silky feeling like you've never experienced before!

You-nique™ Non-surgical Nature's Facelift™ creates a more youthful appearance by toning and firming facial muscles, diminishing fine lines and wrinkles, and improving skin tone and color. As it dries, this revolutionary product stimulates the nerve endings and activates the muscles. This process helps re-suspend the muscles of the face and neck, restoring firmness and a more sculpted appearance. Nature's FaceLift™ is made with natural ingredients specially selected for their soothing and revitalizing effects.

Special **enzymes** that are contained in the ingredients of the product help to promote collagen growth and incite the production of acetylcholine. Acetylcholine is the chemical used by the body to activate muscular activity. By fortifying the collagen matrix in your skin as well as toning and firming the muscles of your face, you will be able to reduce fine lines and wrinkles from the very first application.

*The first time you use the technologically advanced Nature's FaceLift™, allow time to apply it to only one side of your face, so you can see firsthand the differences from side-to-side. Unless you compare sides, you might miss some truly dramatic differences. Then, apply the product to the other side of your face.*

After

*No Harmful Chemicals!  
You'll be amazed  
by the results!*

## Reveal Your Inner Beauty! Uncover radiant youthful skin naturally!

Our highly effective Nature's Enzyme Peel™ works immediately to exfoliate the skin, removing dead skin cells, clearing pores, and leaving your face feeling as soft and smooth as a baby's! Revolutionary **botanical and fruit enzyme blends** safely remove blackheads, whiteheads, and dead skin, while improving cell regeneration, skin tone, and color. Regular use leaves the skin looking healthy, even glowing!

Our exclusive formula boasts a **barbadensis aloe vera gel base** and **silk amino acids** to nourish and protect the skin, immediately enhancing the results, and providing a measure of hydration and protection that no other product on the market can match. The aloe hydrates and nourishes the fresh, new skin revealed by the peel, while luxurious silk amino acids provide natural UV protection to keep it looking younger, longer. Our formula is extremely gentle, and with no "scrubbing beads" or granules, its powerful yet gentle exfoliating action is ideal for those with sensitive or combination skin.

To use, smooth a small amount of the Nature's Enzyme Peel™ onto your face, and rub in circular motions. Soon, you will feel the gel change into a thin liquid. A few seconds later, you will see and feel the dead skin begin to roll up and peel away!
